

WHY I DON'T USE PROCEDURES

- Don't trust them
- Not up to date
- Not enough detail
- Too much detail
- Too difficult to follow
- Doesn't match current practices
- Not convenient

More Important than Ever Before

Good quality procedures are mission-critical. With 60-80% of incidents due to human error and with an increasingly inexperienced workforce manning critical operations, procedures are business critical for risk management and loss control.

Procedure Program Transformation

Combining advanced procedure technologies with human-factored best practices, ATR can transform your procedure program providing best-in-class solutions.

Conventional Procedure Limitations

Conventional procedure programs consist of lots of file-based documents designed to produce a paper procedure. The valuable procedure content is locked up in hard-coded formatting restricting proper evaluation, training and usage reducing value and increasing risks.

Advanced Procedure Technology

ATR's SmartProcedures provides next generation capabilities for maximum procedure value. SmartProcedures help make your procedures better, safer and smarter, while reducing formatting and administrative tasks up to 75%
