

Powerful online training, testing and records management for the process industries

TRAQS Learning Management Suite

TRAQS provides powerful online training and testing and tracks all training including online, classroom and OJT. Training assignments can be made to organizations, jobs or individuals and scheduled and automatically re-assigned. This powerful tool also includes comprehensive test development and management, Troubleshooting and What-If scenarios and drills, and includes a multimedia computer-based training authoring tool.

The powerful reporting capabilities allow you to extract training and testing data with customized reports. TRAQS is your solution for knowledge-building and training management.

Overview

Web-Ready

- Support both Oracle and MS SQL Server
- Thin-client user access via your intranet

Training Management

- Manage all training records
- Import records from other systems
- Tracks on-line and off-line learning (classroom, hands-on performance, paper-tests, etc.)

- Create comprehensive tests from different topics
- Individual question tracking per individual
- Question and test remediation options
- No-record option for self-check testing

TRAQS is an integral part of ATR's PRISM Performance Suite used in hundreds of locations around the world. Chosen by the world's largest chemical company as their standard solution, PRISM offers state-of-the-art integration of training, compliance and performance support products to help you meet your critical operational, performance and safety objectives.

Easy to use employee view lets users access their online training as well as training history. They can take refresher training on a 24-7 basis at their convenience as well as sign up for scheduled training events or optional online training.

peoplepoweredperformance

TRAQS Learning Management Suite

TRAQS is an all-in-one training productivity system. In addition to providing your employees with online training, testing and access to their training records and scheduled assignments, TRAQS offers powerful job and skills qualification tracking, extensive reports, and automated notifications. TRAQS captures online training, testing, classroom training and on-the-job training records.

The TRAQS Suite includes the powerful Challenge test management and delivery system and extensive skills and job qualification tracking.

TRAQS lets you track classroom training, safety meetings or off-site training in one system along with your online training records

job qualifications

The Challenge question/test management system provides a wide variety of question types and extensive test options. These tests can be used for training, drills, as well as comprehensive exams.

skills management

24-7 online training can increase training efficiencies drastically, while freeing up personnel. With TRAQS you can use off-the-shelf training CBT or develop your own. OpenTrain allows you to use your own development tools or common document formats like Word or Powerpoint.

Interactive, multimedia CBT is easy to produce with the OPUS authoring tool. With easy-to-use templates, CBT courses can be developed in hours. Link your SCORM compliant courseware or common media like Powerpoint and Word files.
