

## **Questions Submitted in Reference to SPI-9 Expansion, 2008**

***Question:*** *Could you email a color copy of the Village SPI-9 Zoning Expansion Study or provide a link for finding it? Also, please clarify the area scope of this RFP. Does it include the Current, Phase 1, and Phase 2 or other?*

**Response:** The scope of the proposed work is all of the shaded area - including both light and dark shading - on the study area map. The limits are anticipated to extend to one parcel deep to the east of Piedmont Road, one parcel deep to the south of Pharr Road, a one parcel deep to the north of Peachtree and captures the west village which is bounded by Andrews. The lighter shading indicates the area in the existing SPI and the darker shading is the expanded to be captured in this scope. One key thing to keep in mind is that this is the boundary that we anticipate, but that we are expecting the selected firm to determine the final boundaries and structure of the proposed district.

***Question:*** *Will firms representing existing property owners in the SPI in rezoning matters be disqualified?*

**Response:** Firms doing work with current property owners will not be disqualified from consideration.
