## **EDITOR'S FOREWORD**

**A lot of guys think that of foreplay is having to kiss your girlfriend or wife before she lets you have intercourse. Well a lot of guys think they are great lovers, but a lot of women have other thoughts about that.... I have different thoughts about foreplay.**

**Foreplay, what is that? Good question.**

**Foreplay is whatever creates a little sex flow between your girl and you and holds it there in place so she and you can think about it and enjoy the build up and anticipation of what is eventually to come.**

**Another way of saying it is that foreplay is what "gets you or your partner ready" for the sex act. Since guys are just about biologically ready for the sex act "all the time." Guys seem to forget the value of foreplay, after all, it is something they have to do for someone else -- not themselves.**

**Bad way of looking at it. Why? Foreplay is not just for established couples already having sex. Foreplay is what prepares a woman to have sex with you. Hence, any woman you would like to have sex with that you are NOT having sex with would require foreplay.**

**So foreplay has a role in meeting women, attracting women, picking up women, dating women, having a relationship with women, and making love to women.**

**There are a lot of people who have written about foreplay - what a man can do to prepare a woman and make her desirous of the sex act.**

**I have compiled this free eBook to give you a little of that education.**

**Read it.**

**Learn it.**

**Use it.**

**You'll be glad you did. (And so will the woman in your life.)**

**Your friend,**

# Foreplay – Secrets From Casanova’s Memoirs

It is highly doubtful that many people today have read the whole 4 volume autobiography of Casanova’s life.

It is after all, literature, and not in any sense pornography.

However a careful read though gives one the feeling of the 18th Century in Europe (as Casanova traveled in many countries).

His sexual conduct was limited to only 167 conquests, which by today’s standards, would rate him as an average lover in Moscow or perhaps Los Angeles.

He was, however, a master of seduction, and his techniques of foreplay, as appropriate today as it was over 200 years ago.

## Planning

To say that Casanova was spontaneous in his approach to bedding women would be a mistake.

He was a careful planner, something akin to a general to an impending battle.

He would do research on the target (meaning he was a proto-psychologist), and also, carefully think ahead of ways to achieve his desired result. Most of his plans were clever, and very entertaining to read about.

## Pleasing His Perspective Partner

Being Italian, and of great the great city Venice, Casanova was a master of many of the personal arts, one among them cooking.

In a tavern or home, he was very careful to either prepare his meals himself, or to supervise their preparation.

He had a few standard “pleasers” for his women, as he knew they were sure to please. They were

- Hot or cold chocolate drink. Remember, chocolate and coffee were still novel at that time
- Shell fish, especially the oyster. He was the first to write about its aphrodisiac qualities
- Sparkling wine and fruit (one might imagine strawberries).
- Always a desert with a variety of sweets presented

You can see from the list above, Casanova was ingenious in the use of foods as a tool for seduction.

Meals during that period were not delicate, but heavy with stews and soups.

Casanova would prepare (or have prepared) meals of utmost delicacy and spare no expense.

His only idea was to please his partner but catering to their basic desires, eating being one of them

#### During the Meal Foreplay Strategy

Casanova would measure the courses, and the meal to match his conversation and stories.

He would spark the lady's imagination with stories from his esoteric repertoire and even indicate to them their fortunes.

His concept was to break down any conditioned responses to rejecting his advances. So, keeping the stomach full, the head light, and the mind occupied did the trick.

All this during the meal itself.

Casanova would take the meal across from the lady, but slowly he would sit closer, and by the dessert, he and the lady were in very close company.

#### Closing Techniques

Closing (the word as used today as in a contract or sale) was his greatest talent. He knew the value of foreplay, and employed it in all its aspects.

The final form of finally kissing and fondling his prospective partner came after much teasing and implication.

Casanova was never rude, or crude in any way, and in his refined and elegant manner, slowly broke down the walls of the lady's castle and entered with her complete surrender.

#### In Today's World

Use of Casanova's methods are still valid today.

Women still love to be pampered, and just seeing a man so concerned about the preparation of the meal, and its presentation is a great foreplay technique in its own right.

Try our hero's techniques, and when you see them working, remember him fondly, as this would have pleased him greatly.

# Foreplay – 10 Tips To Drive Your Partner Wild With Passion

Foreplay is an essential ingredient of a satisfying sexual relationship.

Women in particular like lots of foreplay to help them achieve orgasm and of course men love it to.

Here are ten tips to help you get more from foreplay and drive your partner wild with passion.

## 1. Don't Forget To Kiss

90% of women in a recent poll said they liked to kiss more, so make sure that you kiss your partner and do it with passion.

The basics of kissing your partner are explained fully in our other articles, but the trick is:

To relax, use variety follow your partner, use your body and do it with passion.

Kissing is one of the best ways to show love and desire and is deeply personal, so make sure you do it correctly.

## 2. Target The Neck

If you want to target one erogenous zone to make your partner moan with ecstasy, it's the neck.

It's guaranteed to make any women melt and feel hot and sexy.

Make sure you lick, kiss and nibble it.

## 3. Target ALL The Erogenous Zones

We all know the obvious erogenous zones, but make sure you target them all.

Great erogenous zones include:

The back, and pay particular attention to the buttocks.

Most women have reservations about their bottom so show her how much you love it. Stroke it, kiss it and tell her how beautiful it is.

Other great erogenous zones include:

The ears – An incredible amount of nerve endings are situated here.

The feet – Reflexology targets the feet due to the connection they have to the rest of the body.

Make sure you take time to massage and kiss them, it's a great way to relax your and turn your partner on.

The backs of the knees - Not really thought of as an erogenous zone, but an incredible amount of nerve endings are situated here.

The Inner thighs – Are highly sensitive and a great tease as your partner will wonder where your hands and lips will wander to next.

#### 4. Oral Sex

There is not enough room here to cover all the ways to turn your women on with oral sex (see our other articles) but one thing is a must:

Communication – Many women complain that their partners do not do oral sex correctly.

So communication is a must, ask her exactly how she likes it and follow her lead.

Many women become very self conscious and think their partners are simply doing it to please them.

Show them you are enjoying it and they will relax and enjoy the experience even more.

#### 5. Use Massage

Many women need to be relaxed to enjoy sex and get ready for full intercourse so add some sensuous oils into foreplay and pay attention to the back shoulders and the feet.

#### 6. Set The Mood

Relax before hand and show you have made an effort.

Take her to dinner or make sure you have champagne on ice show your partner you care love and desire them.

For women sex is not purely a physical act, it's a mental experience so show your partner how much you care.

#### 7. Tease

Foreplay should be fun and not finish too soon.

Practice bringing your partners desire up and then moving away from the area targeted, tease her until she can take no more.

This will heighten the expectation and make full sex much more fulfilling when it comes.

#### 8. Communicate

You need to explore your partner's inner desires and try and please them. Many couples are reluctant to talk about sex but your both adults and you need to do so.

Don't rely on trial and error, make sure you talk frankly and openly.

#### 9. Try Something New

Don't go through the same routine every time!

Sex will get boring add some different aspects and experiment.

This may mean introducing toys, food or whatever else you can think of.

Nothing kills a relationship more than predictability and boredom.

#### 10. After Sex

Don't just walk out – take time to tell your partner how much you enjoyed the experience.

Kiss cuddle and tell her how wonderful it was – Make your partner feel wanted.

So there you have 10 tips that will increase the pleasure of foreplay more and make sex far more enjoyable, for both you and your partner.

# Foreplay – The Key To Sexual Success – Opening Moves

For many people, the perception of foreplay is kissing and petting.

Nothing could be more wrong. Foreplay consists of pre-foreplay, non-linguistic communication (including body language), and acts and deeds which are intended to evoke a response from a potential sexual partner to proceed to intercourse.

Learning what foreplay is, how to execute it will be your key to sexual success.

### Foreplay is Not Exclusive to Men

Women also must resort to foreplay, and often do in subtle but highly evocative ways.

They often will touch a man's hand while speaking, wet or bite her lips while the man speaks, invade the man's private space, and other feminine guiles that are just part of their arsenal of foreplay techniques.

### Pre-Foreplay

The man who is excited, enamored, or highly desirous to be a woman should consider well the period known as pre-foreplay.

The women, unless incredibly naïve, will understand the pre-foreplay moves and respond to them. Very

good and effective examples of pre-foreplay are:

- Small gifts, only trifles, but appropriate to a situation.
- Gifts of flowers, but only roses that have a wonderful and entrancing aroma.
- Discover something of your expectant partner. Give it her, at a very appropriate minute. This will show her your sensitivity and even intellect.
- Remembering every woman is concerned about her “nesting” responsibility, be to her eyes a prospective nest partner.
- At a diner, order correctly. Refrain from heavy foods that can destroy the mood of love. It's not banal to order oysters, and champagne.

It is good foreplay.

For dessert, order for yourself some sorbet, but for her, something that is sinfully sweet and tasty; such as cream filled profiteroles, with chocolate syrup. Finish the diner with a

digestive drink, perhaps an expensive cognac. If she doesn't drink, suggest a short espresso.

### Watch the Body Language

The woman (or man) may be talking to you without words. This is called non-linguistic communication.

The woman can play with her hair, bite her lips, or sometimes gaze into your eyes for a moment, as if to search for something. She is saying "your foreplay is working".

Continue by invading her personal space.

Perhaps the woman put her hand on your arm while she was talking, or even brushed her leg against your (seemingly accidentally). All these are signs. You must be observant and see what her body is saying.

Return, carefully any intimate gesture.

### When Does Foreplay Begin?

It really varies from couple to couple, but you can assume if one of the two of you has invaded the personal space of the other, and the reaction was not negative, foreplay has begun. It's now time for a dance if appropriate, or holding a hand during some moment of a conversation.

### Sealed with a Kiss

If the foreplay has moved into the kiss, the serious foreplay has begun. Kissing is one of the most intimate gestures between people.

You share even your breath, and the sensation of a kiss can thrill the whole body. Learn to kiss well, or don't kiss at all. Kissing is foreplay's calling card, and the opening moves are now over.

Time to move into more serious foreplay actions, which are discussed further in other articles in this series.

# Foreplay: The Open Doorway To Sex - Men's Version

So you found a lady that fills your mind and heart with desire. You dream of your intimate relations with her, but how to begin? Foreplay is your open doorway to sex, but you must know how, when, and what to do in foreplay.

If you think foreplay is just some casual kissing, think again. You are way off the mark. Foreplay begins with conversation, and a woman is receptive far beyond what any man might believe. Foreplay is your option of filling her heart with the same desire you have.

## When Does Foreplay Begin? Stimuli to the Five Senses

Foreplay begins, if you are ready to understand it, with your first contact. You must always arrive to your lady with flowers.

These flowers, roses particularly, must have a delicate, sweet, and lasting aroma. She will smell them, and her senses become far more acute than you might imagine. Ladies will always smell the flowers you bring them

Try to touch her hand as you give the flowers...some light and gentle stroke. This will be the first stimulus to her sense of touch. As you give the flowers, compliment her on her looks and this will be the first stimulus to her sense of hearing.

Look into her eyes as you compliment her, and the sense of sight is filled with your sincere glance, and if you are good at this kind of thing, a longing desire.

We are left with the sense of taste. If you are taking her out to diner, you will have a great opportunity to please her. If not, there is always candy or try and get her to drink some wine.

## More Serious Stimulations

If foreplay has begun from the first contact with your lady they continue on as you become intimate. Learn where are her erogenous zones (slightly different for each woman), and go for these areas. That means light and delicate stroking, kissing and nuzzling these areas.

As a general rule the shoulder, near the nape of the neck is a great area to start. Kissing on the mouth is serious stimulation, and good foreplay, but let that be a bit later, Kiss her on the inside of the forearm, near the inside of the elbow. While you are kissing her, also remind her how beautiful she is (more aural stimulation), and if you can, keep some eye contact.

If you find yourselves now undressed, you must remember that kissing on the obvious

areas; the breasts and genital zone, will bring greater results if you move there slowly, and tease before you arrive.

Kiss the inside of the thighs, about 15 cm from the knees, and even on the lower leg are great nerves to stimulate. The back of the calf is full of nerve endings...kiss and stoke there too.

Move to the breasts. If your lady has large breasts, with a large nipple area, you might use more of a kissing-sucking combination. If she has smaller breasts with girlish nipples, you can kiss and lightly bite the areas (do not cause any pain in any way during foreplay).

Use your tongue and go in clockwise circles around the nipple. You can slightly blow also some cool air on the nipple after sucking and kissing it.

Continue kissing as you arrive near to, but not on the genital area. Kiss and stroke around it, near to it, but do not touch it.

The most serious part of foreplay can be cunnilingus, which is the subject of several articles in their own right.

# The Pleasure Guide To Foreplay

Sexual pleasure, to be experienced at its full extent is like building a house, You have to do some ground work and build a sturdy foundation from which the passion will grow.

Who was it who said that foreplay for women lasts for 24 hours? - That's 24 hours of strutting and wooing to win the attentions of fair lady. This is not surprising considering our hectic lives or work, kids, the house, pet, daily problems such as a gas leak, the car broke down, the cat ran off and little Johnny has fell down and badly cut his knee again! No wonder 24 hours is needed, its sets aside time to prepare and to push the daily trouble to one side and to feel special and in the mood for intimate. However, despite what you might think, men also appreciate 24 hours of foreplay.

Things the 24-hour preparation period should include

**Personal Hygiene** - Everyone has more sex appeal if they smell good, but also a little deforestation never goes a miss. Guys are much more likely to get their balls licked if they are clean shaven because they feel nicer to the tongue. Girls can make a bit of an impact here by styling their pubic hair into interesting shapes. Girls should also make sure that their legs are silky and smooth. Particular attention should be paid to fingernails. Dirt down fingernails can cause infections, particularly for ladies because the dirt and bacteria can be left inside the vagina. Guys need to bear in mind that long sharp nails scratch intimate areas. Ladies need to check your nail varnish. Tired and chipped nail varnish does not look as sexy when you're handling his cock or touching yourself.

**Dress For Sex** - The clothes that you wear influence how you feel so dress to kill. New underwear especially helps women to feel sexy and it's a sure way of improving your love life because if she feels sexy she will be in the mood for pleasure. If your feeling adventitious or just want to surprise your lover you could opt for something a little naughtier - a uniform of one sort or another. Guys can try dressing up by buying a cock ring, they can look very sexy, make you feel sexy and prolong pleasure.

**Make Time for Wooing** - Stick a naughty memo on the fridge, send a sexy text during the day saying what you would like to do to your lover. Make a quick unexpected phone call to tell your partner that you desire them. Send a naughty postcard email showing them what you would like to happen. These things will keep their mind and yours focused on the pleasures to come.

The important thing to remember in the 24 hour build up is that what you do and say should make your lover and yourself feel sexy and special. You need to set aside time to prepare your selves and your mind sets for pleasure.

# Foreplay – The Key To Ultimate Sexual Fulfillment

According to years of sexual surveys, it seems foreplay was something a man did to a woman prior to penetration.

This is a misconception, and mutual foreplay has proven to be the correct activity to any sexual encounter.

So why is foreplay so important? Let's take a look.

Why foreplay is so important

There is no such thing as too much foreplay either, as it expands and enlarges the sexual experience. Except for encounters known as 'quickies', foreplay has a role that prepares the sexual partners both mentally and physically for the experience.

The orgasms that follow are prolonged and more fulfilling after good foreplay. Foreplay helps make sex more enjoyable.

Foreplay is also important as it gives the woman time for her own built-in lubrication system to start working, and for a man, it helps to increase his libido, the surge of testosterone, and desire.

For a woman, the foreplay begins with a man's overall sensitivity to her feelings.

The flowers she has been presented with, the small gift of lingerie, perfume, or just candy, but these send special signals to the woman's brain and help turn on the sexual centers that reside there.

Setting the mood

Is music part of foreplay? Certainly. The correct choice of music can bring on sexual stimulation just by itself. Also room lighting, and even the smell of the room. All these details are important, and are an integral part of foreplay.

Commencing foreplay

Once the mood is established, you can proceed to more definite foreplay. This foreplay can include the actions of slowly undressing, kissing, petting, and oral sex. Take your time; learn what your partner likes. Undressing can be a real turn on, and learn now to undress yourself in a sexy way. Practice in front of the mirror.

As you begin the formal physical foreplay, take your time, and begin by kissing and caressing. Your kiss must be a physical expression of love and desire. Do not stop kissing

in foreplay however, and make it still during sexual intercourse.

Research reveals that most women complain that their partners don't kiss long enough and move directly to penetration. Kiss your partner on every part of the body (for example, many women enjoy particular kissing and nibbling attention to the neck and shoulders). However, this foreplay is not just for the woman.

A man needs his foreplay too. The woman should assume also a role in foreplay, and not only oral sex. This can mean manual stimulation to his nipples, or kissing them, and other erotic parts of his body. Ask him, he will be glad to tell you what turns him on.

A woman should also be an expert with her hands on his penis. Remember the penis has no lubrication system (as does the vagina), so you need at least saliva, and at best, a water-based (non-toxic) sexual lubricant. Don't be shy to bring out the tube. Most if not all men will love it, and it's a great turn on. Do not use too much as some friction is important.

Be creative

Be creative. While one hand is working on his penis, use the other to fondle his testicles or stroke a nipple. Use your tongue on his testicles or nibble his neck, the inside of his thighs and his nipples. Be prepared for fellatio, an ultimate turn on for most men. He may return the compliment with a long and wonderful cunnilingus, and when are both bursting with desire, and your breathing is elevated, you can then begin penetration.

We will stress again, there is no such thing as 'too much foreplay'.

In his fifties, Mr. L. Rx has some times been called the "Observational Guru" rather than a "Dating Guru" as it is his ability to observe throughout his fifty plus years of experience that allows him to share dozens of unique dating and relationship strategies that apply to different personality types and different situations.

Unlike other "Gurus" who give you one strategy that works for them and then apply it to "all men or women," Mr. L. Rx acknowledges that people have different personalities and that different personalities require different strategies.

Mr. L. Rx's techniques and strategies work for any man no matter what he looks like. Mr. L. Rx points out that he personally has had thousands of dates with beautiful young women in his forties and fifties whereas in his teen years and early twenties when he was a hot-looking young man in his prime, he couldn't get a date.

Mr. L. Rx teaches men and women his unique "observational technology" which allows you to develop your own situationally correct strategies for your own situation and personality in addition to Mr. L. Rx giving you dozens of already tried and proven techniques of his own.

Mr. L. Rx believes that successful relationships develop from sane dating habits and technique, and that communication, observation, and create are the foundations of a successful relationship.

Mr. L. Rx is a firm champion of monogamy when in a committed relationship and a firm believer in "multiple dating" when not in a committed relationship.

Mr. L. Rx believes in family values and is the proud father of four children (three girls and a boy.)

### **How To Make Sex Last Longer**

Many sexually active males would like to "keep it up" longer - until their woman is fully satisfied and for their own more fulfilling, long lasting pleasure. Since it's no secret that it takes women longer to climax, guys need to delay their ejaculation if they really want to satisfy their partner. Everyone knows that longer intercourse is much more satisfying than "quickies" for both parties. Thanks to Dr. Dating, the secret is out - everyone can easily lengthen their lovemaking just by applying the techniques from DrDating's latest eBook, *How to Make Sex Last Longer*.
