**“It took me a long time to find the genuine stuff...you know people who really know what they are talking about...but this is it...after reading and applying this compilation you will be a pro!”**

**- Mr. L Rx**

# How I got 700 Dates in One Year

A special instantly downloadable report to get you to JUMP START your love life.

**Don't sit around the house wondering when you will ever date again when within hours you can get started meeting and dating 100s of women in the coming year.**

Mr. L. Rx has done it and still does it, and he will show you HOW!

In this concise, downloadable, easy to read and easy to implement report you will learn:

-- TWO separate proven TECHNIQUES for generating 100's of dates a year

-- TECHNIQUES that are FAST, and SIMPLE to learn, and that you can START implementing them IN A COUPLE OF HOURS from now. That's right **in just a few hours from now you can be on your way to generating 100's of dates a year.** It is that **POWERFUL.** So powerful, that I'LL guarantee it. If you try my techniques and they don't work for you. I'll give you your money back **NO QUESTIONS ASKED**

-- TECHNIQUES that **don't require you** to have any understanding of women at all. You can be shy, UGLY, and a geek and they will work. IN FACT these TECHNIQUES will not only get you 100's of dates, but the sheer experience of going out on 100s of dates [will give you a better understanding of women](#) than anything you could ever read in a book--anything that I or any other GURU could ever say to you.

-- This REPORT is GUARANTEED to change your love life. That is why I wrote it. There is NO reason for you guys to wait for the release of DATING TO RELATING the book for you guys to start benefitting from my knowledge.

# Dating To Relating – from A to Z

## BOOK OUTLINE OF CONTENTS

### Dating to Relating from A to Z

(A man's guide to understanding women) or

"How went from stupid to smart in just 50 years." Or

"How I get more dates with, relationships with and proposals from Hot Young Women at age 50 than I did at age 25."

#### Introduction

How dating Guru's strategies go wrong.

Different men like different women.

Different women require different strategies.

Be yourself, or you will get someone you ultimately don't like or won't keep.

How to meet women.

The basic problem--what guys do wrong

The Differences between men and women-communication, flirting

Gradient communications

Nothing to fear, don't embarrasses self

This is what girls do, so they understand it and are impressed by it

The basic solution- observation

Reach and withdraw--communication

Get a girl to reach--a lot do it in subtle ways--observe subtleties

Does a girl accept your reach

Overwhelm--does it work- short term, yes--long term no.

Objectives

Prospecting/Qualify- is she the type of girl you are looking for

Part of qualifying is you--don't be someone else to get a girl or you

will get someone you really don't want.

How to let girls down easy. (How to reject non-prospects)

How to develop your ideal scene--meet, experience, communicate, learn

Establish future Relationship begins here

Different strategies for different settings

On the street, at the mall

The grocery store, church, etc.

You know where she works

Advertising

Dating services

Internet

Voice mail  
Friends and family leads.  
Bars, clubs  
Different strategies for different personalities  
Love girls etc,

OK, I met her Now what? (Or how do I get a second date?)  
Differences between men and women-- what women are looking for  
Basic principles  
Listen don't talk.  
Different Women, different strategies , know what you want.

OK, how do I turn this into a relationship  
Different kinds of relationships  
Prostitution (pay for sex)  
One night stands  
Friends with privileges  
Dating with casual sex  
Lovers only.  
Arrangements (you take care of me, I'll take care of you)  
Multiple Lovers  
Swinging  
Affairs (cheating on someone)  
Girlfriend/boyfriend  
Living together  
Marriage.  
Divorce (Yes some people even have sex after marriage, sort of friends  
with privileges phase again.)

Patience--observation, reach and withdraw  
Be yourself-- find the one for you  
Romance--how to maintain and develop and keep a relationship forever....  
Seduction--how to get what you want despite any odds.

What is seduction.?

How to do it.

Multiple relationships--the best lie is the truth.  
Multiple relationships have a place in the scheme of things  
How to qualify girls for multiple relationships.

## **EDITOR'S FOREWORD**

**Understanding a woman's body is essential if you want to be good lover.**

**Most women don't even understand their own bodies fully. Some younger women have gone years without experiencing a vaginal orgasm due to inexperienced lovers. And many have not discovered that they are capable of multiple orgasms.**

**Women can have four distinct type of orgasms – clitoral, vaginal, anal, and the g-spot. And new research has perhaps extended that to a fifth type of orgasm the AFE zone.**

**MEN SHOULD BE SO LUCKY.**

**Study the information here about the g-spot, the u-spot and the AFE zones.**

**Practice it and you will become a pro.**

**No woman will ever leave you over sex when you can teach her things about her own body she never knew were possible.**

**Your friend,**

**Mr. L. Rx**

# G-spot Position - How To Find It A Step By Step Guide

Although the g spot is steeped in mystery it is actually quite easy to find if you know how to look for it and this is what this article is about how to find the g spot.

Find it and stimulate it and you will give your partner immense sexual pleasure, so here is your guide.

Men in the past were hunters and trackers. They had to find their prey in order to survive.

Today's man, it seems, has lost (or at least forgotten) that all important talent.

Even if it's forgotten, if you can follow some simple instructions and you have at least the basic equipment, you can find the g-spot.

The rewards of finding it, and exciting it, will be well worth your pursuit.

## Basic Woman's Anatomy

The G-spot (specifically the Gräfenberg spot named after the German doctor who first found it and documented it), is found the woman's genital area just behind the pubic bone and it surrounds the urethra.

Sound confusing? Lets start at the opening of the vagina (impossible to miss, and if you will search a bit more, you can see the urethra from where a woman urinates).

Assuming you found the opening of the vagina, and using a well lubricated finger as a probe (the middle finger works best), proceed about 4 inches straight in.

The vagina has a top and bottom, and the bottom borders the rectum and anus, and the top borders the bladder.

It's the top we are interested in here.

Do not go too far inside the vagina, as you will come to the cervix, which is the mouth of the uterus.

You have passed the g-spot if you are already there.

So assuming you are only about 4 inches into the vagina, feel with your finger probe the top surface.

You will feel some tissue that is somewhat rougher than the tissue around it. Therein lies the g-spot, or most of it.

If you can imagine that the woman's clitoris is more of an internal and external organ, its nerve ending begin (or end) with the area you are feeling...the g-spot. Found it?

Good.

### G-Spot Stimulation

Popular myths of masculinity and female misconception about large penis' will have little to do with stimulation of the g-spot.

If you have an average size penis, and can hold an erection, you can stimulate the g-spot and bring your lady partner to a profound orgasm.

How is this done?

You need the correct sexual position, and there is one great position which is ideal for g-spot stimulation.

The first is with the man sitting on the edge of a bed, and woman mounted on top of him, with her legs wrapped around his back.

The man's penis is inserted in the woman's vagina, and the woman adapts the depth exactly to stimulate the g-spot.

No thrusting is necessary or required.

Just maintain the erection, press as hard as you can from the pelvic area, so the penis puts pressure on the g-spot.

The rest is all automatic from the female, and soon she will arrive at a deep and satisfying orgasm.

This position also stimulates the woman's clitoris, and this double stimulation brings about this great female orgasm.

### G-Spot Stimulation Variations

A man can insert two well lubricated fingers, fingernail side down, and in a "come here" motion, press the two fingers against the g-spot area.

This is a very good technique also done during cunnilingus, and has a very positive effect on a woman's ability to orgasm and re-orgasm in quick succession.

# The G-spot – How To Stimulate It For Maximum Pleasure

In earlier articles we explained how to locate a woman's G-spot. Now that you can find it, there are special sexual positions to learn that once assumed, will stimulate it, and bring the woman into spasms of ecstasy.

These positions once mastered, will also make the man an indispensable lover.

Please read our earlier articles on location of the G-spot, as it is not easily found unless you know where and how to locate it.

Ernst Graftenburg was a German doctor that actually discovered this area, and it is named after him, the "g" spot. Within the woman's vagina, the g-spot is an area on the front wall, not far from the actual vagina opening.

The stimulation that is effective for the g-spot is a constant and firm pressure, which usually evokes a strong and profound orgasm in the woman.

Assuming you know where it is, you have understood that it corresponds precisely to that area where the urethra is most near to the top of the wall of the vagina.

It is interesting to note that each woman has some variety in where her g-spot is located, so the man must do some research to locate exactly where his partner's g-spot is.

This is done by the man first lubricating his index and middle fingers, and slowly inserting them into a similarly lubricated vagina.

The fingers are inserted with the palm side facing the outside. At the top of the vagina's wall, at about perpendicular with the urethra, the man will feel a sort of lattice-work area (rough and lenticular tissue).

In the midst of the lattice-work is the g-spot and use feedback from your partner to confirm you have actually located it.

Here follows three excellent positions that provide for maximum g-spot stimulation.

- While performing cunnilingus, it's a perfect time to simultaneously stimulate the g-spot.

Again with the man's index and middle finger inserted into the vagina (while the man's tongue is performing cunnilingus) and using the "come here" motion locate and touch the g-spot.

Use steady firm but not too firm pressure.

With the action on the clitoris (from the cunnilingus) and pressure to the g-spot, both partners can assured of both a profound and extensive woman's orgasm.

Note, this will take approximately 20 minutes.

- Another method which is sure to succeed is during intercourse, for the woman to mount the man, but not sit straight, but to lay directly on the man.

The woman will be able to manipulate her position so there is direct pressure to the g-spot. The man has nothing at all to do except maintain his erection, and let the woman move into position.

Once there the man can press slightly with his hips to increase the pressure from his erect penis.

Orgasms, are often simultaneous with both partners quickly follows.

- The g-spot can also be greatly stimulated by the couple finding a swimming pool that allows privacy.

The man stands in the water at the shallow end, and the woman sits on the edge of the rim of the pool.

She slides her legs into the water, and positions herself just enough so the man can enter her.

The man's penis will be directed at this angle directly to the g-spot. The woman or the man can gyrate but not thrust. The g-spot is better stimulated by constant and persistent localized pressure. Mutual orgasms are sure to follow.

The G spot is a wonder of the female anatomy find out how to locate and then stimulate it and you will give your partner the ultimate in pleasure and satisfaction.

# The G-spot - A Woman's Trigger For Mind Blowing Orgasms

The G-spot? Do you know what it is? Where it is? This small article may change your sex life for the better and for good!

Read on and in a few moments you will know all you need to know about a woman's G-spot and what do with it.

Ernst Graftenburg, a German gynecologist discovered the location of a highly sensitive area within the woman's vagina. It is named the G-spot in his honor.

Actually the G-spot is on the front wall of the vagina, about 10 centimeters towards the top of the wall. Graftenburg discovered that just simple and constant pressure stimulation to that area can produce an orgasm.

Anatomically the g-spot is precisely opposite an area wherein the urethra is at its closest to the top of the vaginal wall.

Each woman will have her own special area where the G-spot can be precisely located, so it bears some careful investigation.

To find the g-spot, a woman must be relaxed and comfortable. She must allow you to insert two fingers into her vagina. Once inside (and it's better if you have your fingers lubricated), touch the top of the vaginal wall. There you will soon find an area that is not smooth, but is ribbed with some muscle tissue. If you feel it, you are on the g-spot. Do not exert too much pressure, or you will cause the woman pain and discomfort. However, some firm and constant pressure will soon show you are on the correct area, as the woman will respond very positively.

So, having found the g-spot, what to do now?

- As your fingers are already in position, begin a session of cunnilingus. With pressure on the g-spot and stimulation simultaneously to the clitoris produces the most ecstatic pleasure to almost any woman. You can move your fingers over the g-spot in a "come here!" motion, while you continue the cunnilingus.

Do not stop either the cunnilingus or the moving of the fingers over the g-spot till the woman arrives at her orgasm. You will hear some warning signs by groaning and pre-orgasmic uterine spasms.

Do not stop at this point, but continue. The woman's back will arch and hips rise off the bed, but push them down and continue.

- Another way to stimulate the g-spot is to have the woman-on-top during intercourse.

She will find the g-spot herself, naturally, and direct your erect penis to that area herself.

Her motion and rising and falling on your penis will be, without doubt, g-spot oriented. Her orgasm will be enhanced by also the clitoral stimulation by rubbing her pubic area against yours.

- Strangely enough, the rear entry sexual position called “doggy-style” has a wonderful way to stimulate the g-spot. The thrusting must be slow and regular, with alternating short and long thrusts.

This is a pure sex position with very little ability to fondle, but if the man is able to delay his own orgasm, he will be able to bring great pleasure to his partner.

Do not underestimate the real power of the g-spot in this position.

The g spot is steeped in mystery but all women have one and when you find it and stimulate it correctly your partner will be very grateful

# **Beyond The G-spot- Secrets Of The Female Human Body & The U Spot**

There has much been written about the G-Spot (named after its discoverer, Grafenburg). It is an area within the woman's vagina that, when stimulated, can bring intense pleasure.

Now due to the advances in non-invasive anatomical investigation with MRIs, CAT scanners, and other highly sensitive investigative instruments, the human form is revealing more of its secrets.

Here we examine two newly discovered pleasure areas within the general area of the female genital zone.

The U-Spot.

The U-spot is a small area of highly sensitive erectile tissue located just above and on both sides of the urethral opening.

Some American clinical researchers have recently discovered this area, and proved that if it was stimulated by caress, with the tongue, the head of the penis, or even a lubricated finger, it brought an unexpected and highly intense erotic response.

This is not the urethral opening, but just above and to either side of it.

There is no U-spot underneath the urethra towards the vagina. Care should be taken when attempting to stimulate it, and ask for feedback from your partner.

The Anterior Fornix Erogenous Zone (also known as the A-Spot or T-Spot ,or just AFE)

Recently a Malaysian physician reported the existence of a highly sensitive erotic area just above the cervix, at the innermost point of the vagina. The cervix is a part of the uterus that extends slightly into the vagina.

As it so extends, it leaves a depressed circular area, technically called the anterior fornix. Tests have shown that pressure on this area causes the vagina to lubricate very quickly.

In fact, direct stimulation of the AFE zone can cause immediate and profound contractions only found in orgasm. Some anatomists say the AFE zone is really a evolutionary degenerated prostate, homologous to a man's prostate gland that would be located in just about the same place.

The AFE – Zone and Erotic Pleasure

Technically, the AFE Zone is a vortex of the nerves that carry information from your whole genital to the spinal cord and brain. These nerves, when stimulated, send arousal

signals to the part of your nervous system which enhances engorgement of appropriate areas, and is responsible then for sexual arousal.

This is also true for women that normally are not sexually responsive. Obviously the most easy way to locate the AFE zone is to slide the fingers halfway up the posterior vaginal wall you will find a larger area than the G-spot, which is slightly rougher than the normal vaginal wall.

Recently specially shaped vibrators (long, then and with the neck bent in an oblique way) have come onto the marketplace which are meant for self-stimulation of the AFE zone.

Size Matters?

This is long-standing debate on the benefits or deficiencies of a large and long penis. In the case of the AFE zone, no matter the size of a man's penis, he must be experienced to find, and then stimulate the AFE zone.

For the man with a shorter penis, there are some advantageous positions to shorten the woman's uterus, and thus still find a way to stimulate the AFE zone as well.

The use of the advanced missionary, where the woman will have her legs drawn to her breast, with the man's arms both holding her legs apart, and suspending himself, will create, even if he is short and small of penile stature, complete penetration and stimulation of the AFE zone.

Due to small depression at its location, and roughness of the area, it also provides some intense pleasure for the man as well.

For More FREE Advice On going beyond the G Spot and other free articles and downloads to enhance your sex life, visit: [www.net-planet.org](http://www.net-planet.org)

# G Spot - Hit The G-spot Every Time!

You will learn here how to find the G-spot with your partner, and once finding it, use of a special sexual position to stimulate it, and bring her quickly to climax after climax (once you learn the technique).

To find the G-spot, you need to know what it is, where it is located, and how to identify it.

### What is the G Spot

The G-spot is named after the German doctor (a gynecologist) Ernst Graftenburg.

It is an area inside the vagina, on its front wall.

When this area is stimulated with the correct pressure it often evokes an orgasm. You can locate it as it corresponds to the area where the urethra is nearest to the top of the vaginal wall. The urethra is the opening where a woman urinates.

### Finding the G spot

There are several opinions to exactly where the G-spot is, and indeed it varies from woman to woman. You can be sure however that is somewhere from the urethral opening on to the termination of the vagina.

Using one or two fingers, insert them inside your partner's vagina, touching the top of the vaginal wall. You will feel a lattice-work of muscle tissue, and somewhere in that lattice is the real G-spot. Be very careful how you touch it. Too little pressure and your partner will feel nothing. Too much pressure and she will experience an unpleasant pain.

### pleasuring the G Spot

Once you have located it, you have three methods to employ it to pleasure your partner.

The first method is while performing cunnilingus re-insert two fingers and apply a steady and firm (but not rough) pressure to the G-spot. After about 20 minutes of cunnilingus, and pressure, your partner should experience a steady and strong orgasm.

The second method is by intercourse, with the man laying on his back and woman mounted on top. The man needs do nothing at all, just have an erection and let the woman move and she will press her own G-spot against the man's penis. Orgasm is assured.

The third method is a sexual position known as Kneel and Heels. The woman lays on her back, with the man sitting on his thighs in front of her.

The woman will place her heels on the man's chest with her legs slightly apart. The man

then penetrates the woman, and does not move or thrust, but rather leans back a bit, insuring his penis is firmly touching the vaginal wall.

The woman rather wiggles and undulates. The man's penis will be in an upward tilt and pressing against the G-spot. After some minutes, the woman will experience a strong orgasm, as the same position also stimulates the clitoris.

It must be remembered that to stimulate the G-spot one must apply both intense and constant local pressure in unison.

The man simply thrusting is not effective in this case. I

If the man can hold on long enough, his partner will experience an orgasm that is both deep and long-lasting.

An interesting variation in sexual position is known as the Horse position.

The woman is lying down on her back with the man standing. Again her heels are pressed to the man's chest, and he can penetrate and instead of thrusting, he simply moves with his penis fully inserted into the vagina.

The experienced man can understand where the G-spot is, and a firm and constant pressure brings the desired result.

# The G Spot - Techniques And Positions To Hit It Every Time!

There is nothing you can do more for you lady than to be a considerate and proficient lover.

In today's world however, getting the girl to love you is one thing, but getting her to enjoy your lovemaking and finish to orgasm on a regular basis will make you a hero.

So, what is the G-spot? Where is it?

The G-spot is an area inside the vagina which is packed with nerve endings and engorges with blood when the woman is sexually excited. The G-spot is on the top wall of the vagina, about 5 to 7 cm from the vaginal opening. It is a slightly bumpy or ridged area on the upper wall of the vagina.

Your partner will be glad to tell you when you are directly on the spot.

Why is It Important to the Sexual – lovemaking act?

About 50% of all women get very aroused and feel sublime pleasure when the man is able to stimulate it. The area around the spot engorges with blood (as does a penis and clitoris) and aids in a complete orgasm.

How do I Find it? Once Found, Then What?

The best way to find it (at first) is to engage in cunnilingus and while the woman is excited, insert your fist two fingers pointing upward, as if they were the hands of a clock at about 12:15, some 5 to 7 cm from the vaginal opening.

Make a “come here” motion with the two fingers, while making sure your tongue is very busy the clitoris. The G-spot itself then makes itself very prominent, and regardless if you lady orgasms or not (and should you keep this up for about 20 minutes, she will), move to the position below.

What is the Position to Guarantee Stimulation of the G-spot?

Much has been said and written about this subject, with suggestions of the girl-on-top and doggy-style as good for G-spot stimulation.

While these positions may work, their effectiveness is questionable.

Both of these positions do not utilize the natural anatomy of the woman or the physics of an erection.

An erect penis will (usually should) tilt upwards. This tilt in the other two positions suggested with naturally tilt away, not towards the G-spot. Only the couple's moving and adjusting may bring the penis into contact with the G-spot.

However, there is a guaranteed position that works every time, and is easy and enjoyable for both the man and woman. This is called (from the Ancient Chinese) Breaking Down the Palace Gates.

The woman must be at the correct angle. It can be done in bed with pillows, or easily done with woman lying down on a table with her legs brought slightly to her breast. Her back should be supported at about a 15% angle by pillows.

The man stands in front of her, and enters slowly. He will see that the angle is perfect and will feel the crown of his penis soon rubbing against the soft ridges of her G-spot area.

Deep thrusting is not required, in fact shallow trusting or just pressing of his penis against the spot will be ecstasy to his partner. Most women will cry with pleasure as this is done, and she will melt underneath you.

Then, you can begin alternating between shallow and deep thrusting, till you slowly bring her to orgasm. The man must practice self-control, as he will be ready to finish before the woman is.

The lack of thrusting in this position will help the man delay his orgasm.

This position hits the G-spot every time, and if you are a conscientious lover, you will achieve for your partner orgasms she and you will remember.

# **G Spot - Techniques To Find It And Please Your Partner**

Women can orgasm several different ways, via clitoral, vaginal, and of course the G-Spot, the latter can give her a massively satisfying orgasm if stimulated correctly.

Here we will look at how to find it and give your partner immense pleasure once you do!

Where is the G Spot?

The G-Spot is the area to target for maximum sexual arousal.

You will be able to help give added pleasure and a mind blowing climax to your partner if you can locate and stimulate it.

The G-Spot is essentially a bean shaped area of nerve tissue, located about halfway between the back of the pubic bone and the top of a women's cervix.

The size and location of the G-Spot will vary between women, but it usually lies about 1.5" to 3" inside the vagina.

This area inside the vagina has a different texture; it's ridged, not smooth like the rest of the vagina, and when aroused has a spongy feel.

The G-Spot is not easily located. Sometimes even women have a hard time finding it and some don't even believe it exists, but it does.

All you need to do is to locate it and arouse it and with a little trial and error between you and your partner you can.

Locating the G Spot

To explore and find the G spot, have your partner lie down, knees bent and feet flat on the floor or bed, with a pillow under her buttocks for comfort.

Insert your fingers into her vagina towards her navel. This will be between 1.5 – 3" inches inside the vagina to find the exact spot.

Press with the fingers against the front wall of the vagina. As it's surrounded by tissue and deep in the vaginal wall, you will need to apply a little pressure. When you finally hit the right spot, it will swell the same way a penis does.

Slide your fingers from side to side. Have your partner tell you when you hit the right place and you she will know, as you will see the reaction when you hit it!

## G Spot Technique

When you have found it move your fingers in even circles all around the inside of the vagina walls.

It generally feels best for her if you keep consistent, firm pressure along the entire length of the vaginal walls and use a steady rotational rhythm.

Stop rotating your fingers and rest your fingertips on the ridged area of the G Spot. Then move the fingers in and out and do rotational movements to keep hitting the spot.

Finding a rhythm is what you are looking for here; keep moving the fingers in and out and around constantly hitting the G Spot.

You can give your partner even more pleasure by licking her clitoris and stimulating her G-Spot at the same time, to give her an amazing climax.

Stimulating the G Spot to the level where it will ejaculate requires three components:

1. Time: Needs to be taken to work your partner up
2. Gentle attention: Listen to your partner and find out what gives her pleasure.
3. Tapping: Keep constantly tapping the G-spot while you are moving your fingers.

## Penis stimulation

Penises curve and the ones that curve upwards are most likely to hit the G territory. However if your penis curves to the left or the right, all is not lost, There are options!

If your penis curves to the left, right or to the south, you can position yourself in such a way that your penis hits the spot i.e you need to be in a position where your penis points north.

For example, if your penis curves to the side. You lie horizontally, she lies vertically and you gain the same impact and will be able to hit her G Spot.

If your penis curves downwards, place her on top of you but facing the other way, you will see her buttocks and then move to hit the G spot.

## Other methods of stimulation

There are a number of adult toys such as vibrators etc that are designed to hit and stimulate the G Spot and the huge variety out there means there is one for every women.

Finally...

The G Spot is there in women all you have to do is find it and stimulate it to give your partner huge pleasure.

There is a lot of mystique related to the spot but to find the G spot and give your partner pleasure is really all about communication.

She will be able to guide you, all you need to do is follow her instructions have patience and find out what's right for her.

If you do, you will add another dimension to your relationship and your partner will be very grateful for your effort!

## **ABOUT THE EDITOR**

Mr. L. Rx is the author of the Dating To Relating website ([www.DatingToRelating.com](http://www.DatingToRelating.com) – a popular "dating tip" site for men with over 500,000 unique visitors per month) and the author of the eReport "How I Got 700 Dates In One Year." And the newest eBook "How To Get Your Wife Or Girlfriend To Want More Sex" (all available at <http://www.datingtorelating.com>)

In his fifties, Mr. L. Rx has some times been called the "Observational Guru" rather than a "Dating Guru" as it is his ability to observe throughout his fifty plus years of experience that allows him to share dozens of unique dating and relationship strategies that apply to different personality types and different situations.

Unlike other "Gurus" who give you one strategy that works for them and then apply it to "all men or women," Mr. L. Rx acknowledges that people have different personalities and that different personalities require different strategies.

Mr. L. Rx's techniques and strategies work for any man no matter what he looks like. Mr. L. Rx points out that he personally has had thousands of dates with beautiful young women in his forties and fifties whereas in his teen years and early twenties when he was a hot-looking young man in his prime, he couldn't get a date.

Mr. L. Rx teaches men and women his unique "observational technology" which allows you to develop your own situationally correct strategies for your own situation and personality in addition to Mr. L. Rx giving you dozens of already tried and proven techniques of his own.

Mr. L. Rx believes that successful relationships develop from sane dating habits and technique, and that communication, observation, and create are the foundations of a successful relationship.

Mr. L. Rx is a firm champion of monogamy when in a committed relationship and a firm believer in "multiple dating" when not in a committed relationship.

Mr. L. Rx believes in family values and is the proud father of four children (three girls and a boy.)

### **How To Make Sex Last Longer**

Many sexually active males would like to "keep it up" longer - until their woman is fully satisfied and for their own more fulfilling, long lasting pleasure. Since it's no secret that it takes women longer to climax, guys need to delay their ejaculation if they really want to satisfy their partner. Everyone knows that longer intercourse is much more satisfying than "quickies" for both parties. Thanks to Dr. Dating, the secret is out - everyone can easily lengthen their lovemaking just by applying the techniques from DrDating's latest eBook, *How to Make Sex Last Longer*.
